

Bug #	Description of Bug	Location of Bug	Steps to Recreate Bug or Test Case #	Root Cause
1	Main class does not have proper call for candidates class	Main.cpp	Bug from compile of main leads to not finding initialization in election class	Initialization of the candidate class is not done correctly.
2	Election class does not compile	Election.h, Election.cpp	Attempt to compile	Type "g++ Election.cpp" into terminal when in src file for full list of Root Causes
3	Election class does not correctly shuffle values when prompted	Election.cpp	Set shuffle to true when running program	Shuffle() just returns a pointer to exactly the same list of votes it was provided, without doing anything else
4	Election class does not correctly handle STV elections	Election.cpp	Run election w/STV option selected	STVProtocol() is incomplete
5	Election class does not correctly handle Plurality elections	Election.cpp	Run election with Plurality option selected	PluralityProtocol() does not return anything. It also does not address ties in vote counts
6	Election does not store election results	Election.cpp	Attempt to access election results	Results is currently a local variable in an Election function

[illegible]
